

removed we will arrange an appointment for him with Dr. Song to initiate plans for radiation therapy. Radiation treatment generally is intense and will take about 6-8 weeks to conclude following catheter removal. An interruption of Mr. Constantinescu's medical care at this point would highly compromise his state of health and may nullify the progress he has had recently in terms of his recovery and oncologic condition. Should you have any questions or concerns, please do not hesitate to contact me.

Sincerely,

Mohamad E. Allaf
Director, Robotic Surgery
Associate Professor of Urology and Oncology
Johns Hopkins Hospital
