RE: Nicusor Daniel Constantinescu  
Passport ID: 152829736

6/25/2014

To Whom It May Concern:

In addition to letter dated 6/18/2014, through which we have underlined that any suspension in treatment of patient Constantinescu Nicusor Daniel could lead to annulment of all stages we have gone through so far saving his life, I hereby point out that he cannot be subjected to transportation to Romania having in view his current medical condition.

The equipment with state-of-the-art oncological technology of American university hospitals (AlignRT, Calypso, Cyber Knife, Gamma Knife, IMRT, RapidArc, Trilogy, TTF, True Beam, Proton Therapy) and the experience of American specialists in use of these equipments are not comparable with any other medical centre from Europe or anywhere else in the world, especially in Romania, where these equipments do not exist, as confirmed in the Medical Report signed by Prof. Dr. Petrisor Geavlete, the chief of Urology department, Sf. Ioan Hospital Bucharest.

Sincerely,

A handwritten signature in blue ink, appearing to read "Mohamad E. Allaf".

Mohamad E. Allaf  
Director, Robotic Surgery  
Associate Professor of Urology and Oncology
